Detailed Description

The XFire modulating condensing boiler is a powerful solution for commercial water heating in a compact, small-footprint package. The XFire features an all weather design, is certified for PVC, CPVC, and SS venting (depending on model), and reaches up to 94% thermal efficiency at full fire.

This item includes the basic package components and adds pre-plumbed piping, condensate and gas manifolds (where applicable), an electric service panel, and a wall mount for free standing rack (depending on application). All pumps and controls are pre-wired for easy installation.

Specifications

Select between 300,000, 400,000, 500,000, 700,000, 850,000 BTU models

- Less than 9-1/2 square feet space requirement
- 316L welded stainless steel heat exchanger and copper plumbing
- Boiler Pump, System Pump, Indirect Pump outlets
- Spark ignition with remote flame sensor
- Electronic modulating gas valve and burner, up to 5:1 turndown
- Certified for PVC, CPVC, Polypropylene or stainless vent materials
- Available for natural gas or propane
- Suitable for altitudes up to 10,000 ft. (derate may apply)
- Removable air filter

Features

- 94% Efficiency Condensing, Cat IV venting required (up to 99% at part/load).
- Top side water connections - allows side by side installation.
- Certified under SCAQMD Rule 1146.2. Meets all Low NOx regulations.
- Whisper quiet operation.
- On-board diagnostic center, English, no codes.
