

Remote Module Controller M221 40 IO transistor PNP

Part Number: CCS-TM221CE40T

Description: Remote Module Controller M221 40 IO transistor PNP

Site Map:

Price: \$489.00

Detailed Description

The TM221CE40T is a Logic Controller with IO transistor PNP Ethernet. It has 16 transistor outputs including 2 fast output and positive logic (source) output. It features Ethernet network link yellow for link (link status) and Ethernet network activity green for ACT local signaling.

Specifications

- Sink or source (positive/negative) discrete input logic
- 24V Discrete input voltage
- 10-bit Analogue input resolution
- 100k Input impedance for analog input
- Overload and short-circuit protection at 1.3A
- 1s Automatic reset time
