Part Number: E-EM-208-LCD-A

Description: Self Loading Entrance Module w/ Weatherized Sunlight LCD Display

Site Map: Tommy Store > In the Tunnel > Entrance / Exit Modules

Price: \$16,900.00

Detailed Description

The Tommy Car Wash Systems' **Self-Loading Car Wash Entrance Module** is based on decades of car wash industry experience and represents the pinnacle of easy self-loading car wash design. The module sits at the entrance of the wash and instructs and guides customers through a simplified loading process utilizing the Tommy Transporter Dual Belt Conveyor.

The appealing wide-arch module features a specialized 42" LCD TV built for crystal-clear clarity in direct sunlight conditions. This TV provides clear, uncomplicated instructions for customers during the self-loading process and is weatherized and waterproofed for use inside the high-humidity environment of an automatic car wash.

The arch fits either a custom sign welcoming customers into your wash, or else a full car-length mirror angled over the loading area so customers can visually place their tires across the transporter belt. The entire module is easily installed and integrated into your car wash's controller system.

Specifications

- Stainless Steel
- 42" TV (40" wide x 120" tall)
