

5-1/2" Black UHMW Idler Return Wheel

Part Number: P-C2258

Description:

Site Map: Tommy Store > Parts > Transporter Belt Conveyor Parts

Price: \$25.60

Detailed Description

This individual return wheel is used in the conveyor system in the wash tunnel. The return wheel is used on the idler return under roller unit and connects to the idler return roller shaft. The wheel is 5-1/2" in diameter and has a bore size of 3/4" in the center. It is made of black UHMW plastic and there are nine of these wheels needed to make a full set on the idler return under roller unit. The center bore has interlocking grooves that align the return wheels together on the shaft, allowing the wheels to turn simultaneously.

Specifications

- Bore Size: 3/4"
- Wheel Diameter: 5-1/2"
- Material: UHMW Plastic
- Color: Black
