

Rubber Bumper Stop for Wrap Applications

Part Number: P-M1014

Description: Rubber Bumper Stop for Wrap Applications - Longer and Softer Version

Site Map: Tommy Store > Parts > Z-Wrap Module Parts

Price: \$31.68

Detailed Description

This rubber bumper is used on the rocker arm mounts and Tire Shine arm mounts. This rubber bumper stop is now longer and softer than the original version. It is made from a tough and resilient rubber. It is used to help avoid damage to equipment caused by the swinging wrap assembly by stopping the assembly before it makes contact with other washing equipment. This bumper absorbs the impact equipment makes with other equipment so there is no damage.
