

# Rocker Arm Shock with 3/8" Bushings

**Part Number:** P-M2002-A

**Description:**

**Site Map:** Tommy Store > Parts > Z-Wrap Module Parts

**Price:** \$41.99

## Detailed Description

This shock is used on the rocker brush arms in the wash tunnel. It helps control the motion of the rocker arms while the brushes are being used in the wash cycle. This shock includes two 3/8" rubber bushings, one on each end. If you notice there is fluid dripping out of the shock, that is a sign the shock needs to be replaced. Shocks should push in smoothly and push out smoothly with some resistance. If this is not the case, that is also a sign the shock needs to be replaced.

## Features

- Includes 3/8" Rubber Bushings
- Used on Rocker Arms
